

Mepilex® Up has better fluid handling capacity than other foam dressings^{1*}. This means it can contribute to:

Longer wear time and fewer dressing changes¹

Minimized risk of leakage¹, even under compression

Potentially improved quality of life for patients⁶

Lower cost of care due to fewer dressing changes¹

Fits right into your formulary

Mepilex Up can be used on a wide range of exuding wounds, in all healing stages. It is highly adaptable and seamlessly integrated into existing protocols, without needing to change the choice of compression wraps or offloading devices.

Things are looking up with Mepilex® Up
