The geko™ wound therapy device: Faster recovery and an estimated cost savings of \$2,500 per patient

Worn at the fibular head, this wireless and wrist-watch-size device (weight 10 g) enables the body's mechanisms to promote wound healing by activating lower leg muscle pumps. Stimulation of the common peroneal nerve results in increased blood volume and velocity in the veins and arteries, and perfusion in the microcirculatory system. This translates into about 60% of the blood flow generated by continuous walking.

With five peer reviewed papers published (with two more accepted) from work in Ontario, the geko™ device is attracting attention in home and long-term care across Canada as an innovative tool to improve circulation, promote wound healing and reduce edema. A recent Ontario evaluation with new venous leg ulcer patients demonstrated a cost savings of approximately \$2,500 per patient while significantly shortening the healing time. TrioMed antimicrobial medical tapes and dressings

Based out of Canada and Europe and present globally, I3 BioMedical Inc. manufactures and pro-

vides the patented TrioMed medical tapes and dressings series.

The TrioMed technology incorporates a broad-spectrum and powerful tri-iodide antimicrobial engineered to eliminate the microbiological reservoir found on all medical tapes and dressings, without releasing chemicals to the patients. The global contamination scientifically demonstrated and published internationally can now be eliminated from patient care without cost increase or procedure changes.

TrioMed product features:

- Neutralizes up to 99.9% of harmful pathogens on contact
- Hypoallergenic
- Latex free, flexible and conformable
- Strong and reliable adherence
- Class 1 medical device
- Approved in more than 50 countries
- Available in breathable non-woven and waterproof

TrioMed Antimicrobial Medical Adhesive products provide the ultimate interactive antimicrobial shield by effectively killing harmful microbiological contaminants found on the external surfaces of medical tapes and dressings and are an effective solution to stop this widespread contamination.

1st and only self-cleaning medical tapes and dressings

IT'S TRIOMED OR IT'S CONTAMINATED

It's scientifically proven:
There's widespread microbial contamination of
standard bandages.

Breathable and waterproof,
TrioMed contains a powerful, non-irritating
antimicrobial agent proven to eliminate
99.9% of microbes†.
