

Did you know patients with IAD are at **greater risk of developing a pressure injury?**

What's your strategy for reducing skin injury?

Sage Prevalon AirTAP® Patient Repositioning System uses air-assisted technology to reduce the risk factors that can contribute to pressure injuries

- Reduce pressure by offloading the sacrum
- Manage moisture and body heat
- Minimize shear and friction

Sage Comfort Shield® Barrier Cream Cloths with 3% dimethicone delivers incontinence skin protection

- All-in-one formula contains skin protectant plus cleansers, moisturizers, and deodorizers
- Goes on clear making skin assessment easier
- Use with anti-fungals without removing dimethicone barrier²

Together, we can work to decrease your prevalence of both IAD and pressure injuries.

Visit sageproducts.ca or call 800 323 2220 to discuss an implementation plan on how you can incorporate these products into your protocol.
