Hydrofera

Hydrofera produces a unique line of versatile, non-cytotoxic, antibacterial wound dressings utilizing its proprietary polyvinyl alcohol (PVA) and polyurethane (PU) foam technology. The PVA line has natural negative pressure that facilitates incredible absorption, autolytic debridement, disruption of biofilm and flattening of rolled wound edges. From onset to outcome, the Hydrofera Blue® suite of wound dressings powerfully tackles any type of chronic or non-healing wound while shortening healing times, lowering treatment costs and delivering better patient outcomes.

Please contact daniel@hydrof.com for samples.

Integra® LifeSciences

Integra® LifeSciences is committed to its goal of delivering the highest quality medical technologies and services. We value excellence and possess an unwavering commitment to our customers and the patients we treat.

Wound dressings facilitate the body's natural healing process and provide an optimal healing environment. The choice of appropriate dressing is influenced by many factors and will vary depending on the type of wound and objective (e.g., necrotic – debride; infected/odorous – reduce bacterial load/eliminate odour; sloughy – remove slough; granulating – promote granulation or epithelialising – maintain moist environment) and level of exudate (dry, light, moderate or heavy). Having a resource available, like the MEDIHONEY® Application Guide, can help make the decision easier. To request a copy, please contact your local Integra® representative or email us at IntegraCanadaRSVP@integralife.com.

To learn more about Integra's Advanced Wound Care Solutions, please visit us at www.integralife.com.

Medline Canada – Together Improving Lives

Medline is a leading global manufacturer and distributor of high-quality medical products and services to the health-care industry. Our expertise in health-care solutions throughout the continuum of care, coupled with the scale and agility of our supply chain, allows us to partner with our customers to enhance patient care, improve clinical outcomes, drive effective cost management and provide fast access to quality products. In Canada, Medline is deeply committed to the health and wellbeing of our customers, employees, partners

and community—standing for a higher purpose of Together Improving Lives. With 550+ employees, including 125 dedicated sales and clinical professionals, and nine distribution centres located across Canada, we are a trusted partner in delivering the health-care needs of Canadians from coast to coast.

Mölnlycke

World-Leading Medical Solutions Company with a Swedish Heritage

Around the world, health-care systems and professionals are under pressure to deliver better care to more people and at a better value. They need innovative solutions they can trust. That's where we come in. We're here to advance performance in health care. So, we're always on the lookout for new ways to improve. Our focus is providing effective solutions and offering better value for money.

We have one purpose: to advance performance in health care across the world so that health-care professionals have what they need to achieve the best clinical, patient and financial outcomes. But different health-care professionals have different needs. So, we start by listening and making sure we understand them. Then, we create solutions that are right for them and for their patients, and that are supported by evidence. We contribute to advancing performance in other ways, too, by sharing knowledge about our specialist clinical areas and by helping shape health-care policies and protocols to raise standards of care world-wide.

We have a strong commitment to health-care professionals, and we're proving it every day. Although we're a global company, our headquarters are still in Gothenburg—just a short distance from the town of Mölnlycke (pronounced 'Mon-licka'). The is the place where the company was founded in 1849 and the origin of the Mölnlycke name.

ANACAPA®
T E C H N O L O G I E S

Is proud to announce the  **MOHAWK MEDBUY**
CONTRACT AWARD #C11253
EFFECTIVE AUGUST 1, 2021 JULY 31, 2023

anasep⁺
GEL

Anasept® Antimicrobial Skin and Wound Gel:

Anasept Gel is a clear, amorphous, isotonic hydrogel that helps maintain moist wound environment that is conducive to healing by either absorbing wound exudate or donating moisture, while delivering 0.057% broad spectrum antimicrobial sodium hypochlorite. Anasept Gel inhibits the growth of bacteria such as *Acinetobacter baumannii*, *Clostridium difficile*, *Escherichia coli*, *Proteus mirabilis*, *Pseudomonas aeruginosa*, *Serratia marcescens*, *Staphylococcus aureus*, Carbapenem resistant *E.coli* (CRE), Methicillin Resistant *Staphylococcus aureus* (MRSA), and Vancomycin resistant *Enterococcus faecalis* (VRE) that are commonly found in the wound bed, as well as fungi such as *Aspergillus niger*, *Candida albicans* and *Candida auris*.

INDICATIONS FOR USE:

OTC: Anasept Gel is intended for OTC use for management of skin abrasions, lacerations, minor irritations, cuts, exit sites and intact skin.

Professional Use: Anasept Gel is intended to be used under the supervision of a healthcare professional in the management of wounds such as stage I-IV pressure ulcers, partial and full thickness wounds, diabetic foot and leg ulcers, post surgical wounds, first and second degree burns, grafted and donor sites.

Anasept® Antimicrobial Skin and Wound Gel:

Health Canada License # 97167

Perfuse Medtec Inc.

The geko™ device does one thing and just one thing. It significantly increases blood flow, about 60% of that achieved by continuous walking. (Nothing on the market can achieve parity.) As a wound care provider, you can appreciate how the lack of blood flow can be a root cause of wounds. Enhancing blood flow is central to the healing process. By improving blood flow, edema is managed, pain is often mitigated and even the toughest of wounds begin healing.

Perfuse Medtec is the exclusive Canadian distributor of the geko™ device. This 10 g, self-contained, wearable adheres to the side of the leg to activate the lower-leg muscle pumps. Pain-free stimulation of the common peroneal nerve is the simple mechanism behind the performance.

Urgo Medical North America

'Better healing'—and living unhindered by wounds—is within reach for patients. Urgo Medical North America empowers and equips clinicians to make a difference in their patients' lives by providing innovative, proven wound care solutions that minimize the pain and burden of wounds, help more patients heal and close their wounds sooner. After establishing UrgoTul Ag as a first-class dressing for infected wounds, Urgo is now bringing two unique technologies to the Canadian market: Vashe Wound Solution to cleanse all your wounds and the interactive dressing UrgoStart Plus to reduce the burden of chronic wounds (diabetic foot ulcers, leg ulcers and pressure injuries).
